

2nd Global Conference on Carbon Nanotubes and Graphene Technologies

The 2nd Global Conference on Carbon Nanotubes and Graphene Technologies took place in Lisbon, Portugal, from 12 to 14 of February 2020. Scientists and engineers came from all over Europe, Japan, Canada, USA, India and China to share the latest scientific and technical developments in solid state and electrochemistry science and technology. Several sessions were given during the 2 days. One keynote talk was given by Elena Tatarova on “Microwave Plasma Enable Single Step Synthesis of Graphene and Graphene Based Hybrid Nanostructures” and two invited talks were given by Neli Bundaleska and Ana Dias, where important results concerning PEGASUS project were presented that triggered interesting discussions and future collaborations.

Project coordinator Elena Tatarova has delivered a keynote talk about PEGASUS project.

Dr. Ana Dias has delivered an invited talk about plasma-based production of graphene-metal oxide nanocomposites.
