

PEGASUS day at iPlasmaNano X conference

The PEGASUS day was organized during iPlasmaNanoX conference, in Poreč, Croatia from 15 to 20 of September 2019. The conference gathered researchers from Europe, Japan, USA, Korea and China working in the cutting-edge field of Plasma Nanoscience. One of the sessions was dedicated to PEGASUS project. Project coordinator Elena Tatarova presented the main objectives of the project. Invited talks about the main results achieved were delivered by Ana Dias, Amélia Almeida, Neli Bundaleska, Dmitry Tsyganov, Edgar Felizardo, Júlio Henriques, Prof. Evgenia Valcheva and Thomas Strunskus. The results presented have sparked significant interest among the participants and new ideas for cooperation have been purposed and discussed.

Project coordinator Elena Tatarova has presented PEGASUS project

Dr. Ana Dias has delivered a lecture about graphene-metal oxides nanocomposites fabricated with microwave plasmas.
